

Android Workshop

School of Information Technology, MATS University conducted One-week workshop on “**Android Development**” for graduate students of MSIT from 11-16 of January 2016.

Mr. Yogesh Yadu Technical Trainer from Blue Banyan, Raipur gave the exposure on android development from its basics that includes installation of Android SDK with JDK 1.8 and development of small android based app.

Students learnt a lot about android development in the seminar and got good understanding of application development using android platform targeting mobile phones.
